Get specific access profile

### Endpoint

GET /access-profiles/{accessProfileId}

### Response body example

```
[
  {
    "id": 5215,
    "categoryCount": 2,
    "deviceCount": 1,
    "allowedDomainCount": 1,
    "blockedDomainCount": 1,

      "name": "TEST ACTIVE SCHEDULE",

    }
  }
]
```

### Create access profile

#### NOTE

Request payload might need to be updated because as per current implementation access profile is considered as inactive if it has no device assigned and safebro-config message is not sent. Currently device parameter is not present in request body. Also `pauseInternetSeconds` has input value 600, yet `internetPausedUntil` is null. `scheduleCount` value in response is also incorrect because two schedules are always created by default in each profile.

**\*color and name properties must not be blank, color is limited to 6 characters and name is limited to 255. Also if `pauseInternetSeconds` is 0 or below 0, the internet for this profile will be un-paused.**

### Endpoint

POSTT /access-profiles

### Request body example

```
{
  "agentId": "3293005",
  "partnerAgentId": "e4956e45a488",
  "color": "253544",
  "name": "Postman3",
  "avatarId": "1",
  "pauseInternetSeconds": "600"
}
```

### Response body example

```
{
  "id": 5225,
  "categoryCount": 0,
  "deviceCount": 0,
  "allowedDomainCount": 0,
  "blockedDomainCount": 0,
  "color": "253544",
  "name": "Postman4",
  "internetPausedUntil": null,
  "avatar": {
    "id": 1,
    "url": "http://mobile-service/access-profiles/avatars/1",
    "modifiable": false
  },
  "scheduleCount": 0,
  "activeSchedule": null
}
```

### Update access profile

#### NOTE

Request payload might need to be updated because as per current implementation access profile is considered inactive if it has no device assigned and safebro-config message is not sent. Currently device parameter is not present in request body. Also `pauseInternetSeconds` has input value 600, yet `internetPausedUntil` is null.

### Endpoint

PUT /access-profiles/{id}

\*if `pauseInternetSeconds` is 0 or below 0, the internet for this profile will be un-paused.

#### Request body example

  "pauseInternetSeconds": "3600"
}
```

#### Response body example

## Avatars

 Get access profile avatars - PARTIALLY WORKING

### NOTE

It is not clear to me how querying should work. If I set up the request as per documentation I get one type of error. Changing places of query parameters results in another. Need more investigation. A query without parameter modifiable works, however does not return newly created/added avatars only default ones.
